

Greece Rally 2x20

COVID19 SAFTEY PROTOCOL

The Off Road Team and Organizers of Greece Rally 2x20 met after receiving the Health protocols sent by the Ministry of Sports and the Health Committee, on Wednesday 6/5/2020, regarding the start of racing events.

Given that motorsport itself does not increase the risk of transmission of the Covid-19 virus given the distance and equipment of the competitors (helmet-gloves) and the assemblies in sports facilities (tracks), which are responsible for the spread of Covid-19, we decided and will apply, in accordance with the applicable provisions and in order to ensure the health of our athletes and staff working in the sports facilities, the following:

- The arrival / departure to / from the sports facilities will be done from a single entrance / exit, which will be controlled by the staff of the facility.
- Security will only allow entry to the athletes, coaches, doctors and technical staff provided. No visitors will enter without prior permission from the Administration of the facility.
- Upon entering the sports facility competitors will be scanned for symptoms, if the presence of any symptoms are noted they will be recorded in a special list of incoming-outgoing and will be signed by all those entering the sports facility. Those who state any of the symptoms, are not allowed to enter. A list will be archived daily, with the care of the person in charge of the installation, in order to facilitate any necessary tracking. It is recommended that, where possible, thermometer readings to be performed on those entering the facility, with denial of entry for those with a temperature of more than 37 C. In a suspected COVID-19 case, he/she is advised to see our doctor in the medical center of the race, stay at hotel room and contact his/her doctor.
- Competitors will be directed to an open space with the use of a tent. The minimum distance between tents will be 5 meters.
- In the case of either team crews or mobile crews that are constantly changing tires, it is imperative that the health rules (mask-gloves-distances-disinfectants) are followed by all those involved.
- In the paddock area, the competitor is allowed to be accompanied by one mechanic. The total number of attendees cannot exceed 80 people (including employees-medical and nursing staff-cleaning staff, etc.). All except the athletes must wear masks and gloves.

- There should be a 70% alcohol (or gel) antiseptic solution in prominent places and paddock area. Public toilets should be avoided, while sinks should always be equipped with liquid hand soap and disposable hand towels. The use of paper or plastic disposable basin covers is desirable, as is the availability of chlorine solution.

- An area (eg a locker room) will be used, if necessary, to temporarily isolate a person with COVID-19 symptoms. It is recommended to remove the person from the facility and isolate them at their home and to communicate with the Federation and he/she personal doctor, while our Central Hospital is notified in any case of a suspected case and undertakes the tracking and the provision of relevant instructions.

Competitors- Before and during the Race:

- Each competitor, prior to training, should ensure that a physician clinically examines all involved in the training and to note a detailed history, with an emphasis on clinical signs and symptoms associated with a recent infection from COVID-19 (both for the person and for his/hers family and social environment). In the event of a confirmed recent infection, the athlete will be referred to for extensive pathological and laboratory testing. The medical records of the athletes will be kept by the organizer of the race, subject to the current legislation on personal data protection.

- Competitors must have an athlete's card and a valid athlete's health insurance.

- All participants must respect all the rules, the guidelines and the instructions set from the head office of the Greece Rally race, as The Clerk of the Course, the organizer, the Chief Doctor and the Medical Personnel

- The medical team has the right to make checks and medical examination every day to all competitors at least with thermometer readings before the start and after the finish of every day route
